Significant Events

On 25 July 2012, ODEQ requested support from EPA for air monitoring at a warehouse fire located at Bachman Services Inc., 2220 S. Prospect Rd, Oklahoma City, Oklahoma.

At approximately 1852, EPA and START-3 arrived on site and began collecting facts regarding the incident and the efforts to contain the firewater runoff. EPA conducted air monitoring at the facility and along the spill pathway. Monitoring has not indicated any results above background levels. RP representative stated the incident started at approximately 1245 due to a forklift catching fire, and the fire was extinguished at approximately 1530. No residential areas were evacuated during the fire, although nearby commercial facilities were evacuated. Oklahoma City Public Works Department has created two (2) earthen berms and placed three hard booms in the storm water channel leading towards North Canadian River. RP contractors ECI, and Enviro-Clean of Oklahoma City are on site and have begun staging assets for cleanup activities. RP has collected two (2) samples of the fire water runoff for laboratory analysis. EPA to meet with the City of Oklahoma City, RP and Fire Department today.

Field Operations
